

RUST PREVENTION

CORROSION MANAGEMENT SOLUTIONS

PAPER

ARMOR WRAP® VCI paper is impregnated with safe, water-based rust preventatives on BOTH sides of the paper to allow for optimal rust protection and ease-of-use.

EMITTERS

ARMOR SHIELD® emitters come in various forms from foam pads to emitting devices to prevent corrosion in electrical boxes, export containers or anywhere where packaging is not feasible.

WHAT IS VCI?

Armor Protective Packaging® takes safe and effective water-based rust preventatives (Vapor Corrosion Inhibitors) and impregnates them into easy-to-use packaging materials to prevent rust during shipping, storage or in-process applications. No grease, oils or harsh chemicals needed! ARMOR people and VCI Nanotechnology™ solutions protect products and brands.

POLY FILMS

ARMOR POLY® VCI films combine the benefit of barrier packaging with anti-corrosion protection in easy-to-use forms.

DESICCANTS

ARMOR desiccants work in conjunction with VCI Nanotechnology™ to control humidity by adsorbing moisture in an enclosed space.

RUST REMOVER & PREVENTATIVE

ARMOR offers non-toxic, non-hazardous, water-based rust removal and prevention with its Metal Rescue™ and preventative Dry Coat™.
