

KANAS

➔ Armor Steel Plates

- ➔ Ready Made Armoring Kits
- ➔ Armor Steel Formed Parts

KANAS proudly offers Armor Steel Kits together with any components needed to build armored vehicles. Our team members have vast background of designing and manufacturing of armored vehicles.

We can offer following services:

1. Cutting of armor steel plates
2. Bending and welding of armor steel plates (as per design needs)
3. Making a complete kit with markings of all parts to be installed/welded in the vehicle
4. New design development as per customers' need
5. Accepting sub-contracting of any specific parts to make for AVs or APCs

The most important armoring component that is "Armor Steel" is our own product so we are very competitive in prices and offer the best quality product. Our mill is located in France and we keep our stocks in Dubai, UAE and it helps us to deliver quickly and with confidence the armor steel kits. International certifications are available of our armor steel plates and they are heavily used in Military and MOD contracts worldwide.

Let us know your requirement and together with our technical team members we are available to support you.
